Subject: schedule for EPA Texas Regional Haze rule development
Tex Reg Haze schedule action plan v2. June 14 2017 (005) -1.docx

Steve, David,

Attached is the schedule we are working by to meet our Sept 9 deadline to get the court ordered rule developed and signed.

My understanding is that you have spoken with Wren and Guy about this so forgive me if this is redundant.

We have also worked up a some language that we hope to share with you tomorrow before our scheduled meeting.

Guy is out of town and will want to review the final draft tomorrow morning before we share it. I feel sure he will approve it and forward to you well before the meeting.

Also, I understand you are developing a couple of letters for us concerning; 1) reliability and useful equipment life for the Texas EGUs that would be affected by our discussions; and 2) a request for a trading program for the sources affected by our discussions. If you have a draft of these you are willing to share before the call I think it would facilitate discussions tomorrow.

On another note, we have some people that will be working from the house tomorrow and plan to call in.

I don't remember if there is a limit on the number of lines you have on your conference system, but I'm sure our system would not be overloaded.

Let me offer the use of our call in number. 866-299-3188, conf code: 214 665 2156#

Let me know what you think,

Thanks, Robert

Robert M. Todd, P.E.
